OBJECTIVE

I am looking for an internship where I can gain experience with the things I have learned from college and trainings in an actual work environment and gain even more knowledge from the company's staff. I offer my service and determination to be an asset to your company for as long as I am part of the company.

SKILLS

Html/Css

Python

Django

MySQL

EDUCATION

Riinvest College
Computer science

2019 - Ongoing

During my time at Riinvest, I gained a deep understanding of computer science concepts and developed practical skills in programming, software development, and database management.

TRAININGS

Python programming–ICTKosovo

Python developer–PerProgramera

Python&Django development–Probit Academy

Python programming–BIT Academy

PROJECTS

- Dentist management system

 This system includes features such as appointment scheduling, patient management,blog,and contact with doctor.Using Python,Django and Mysql on the server side and using HTML/CSS on the client side i was able to develop a robust and scalable system that meets the specific needs of dental clinics and practices.

- Taxi app

I have in designing and developing CRUD (Create, Read, Update, and Delete) applications with python,streamlit and mysql that allow users to manage data within a database. This application are used to manage driver and cars in taxi company

- Portfolio app

These applications allow users to create a professional online presence that highlights their skills, experience, and achievements.
